

INNOVATIVE & ATTAINABLE HOUSING FOR LEDUC:

14-Foot Townhomes

MEETING OF COUNCIL

Smaller footprint townhomes offer a proven, community-accepted approach that provides a more attainable entry-level price point for homeowners.

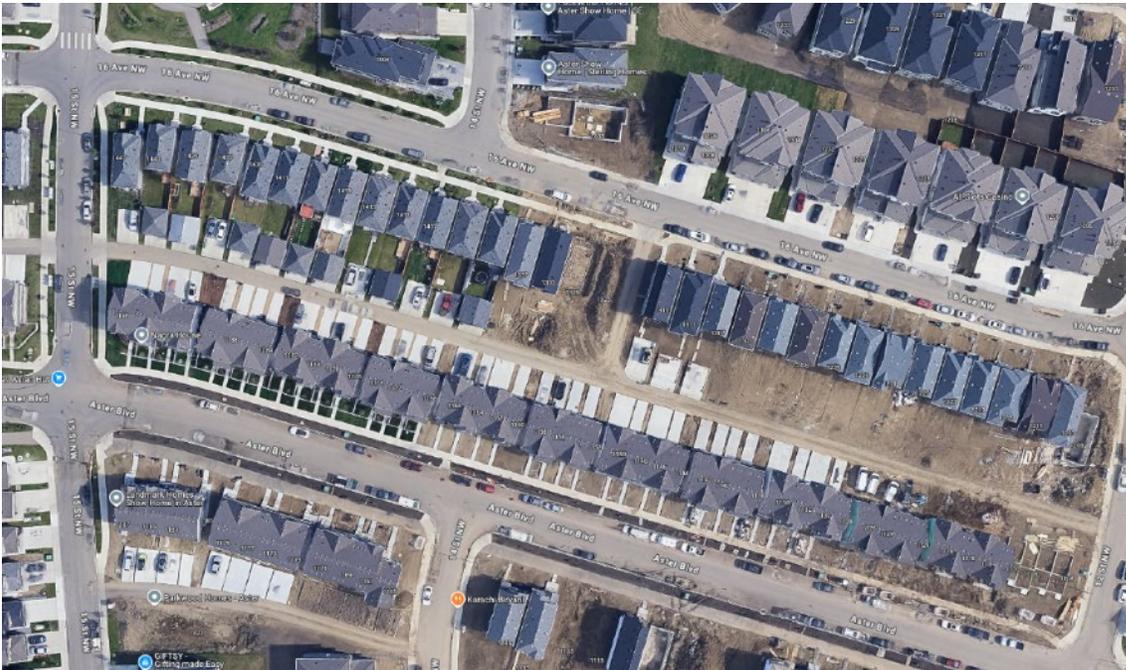

Successfully implemented in communities across Edmonton, these compact, well-designed homes make better use of land while maintaining livability and community character.

Embracing this form of development can help address affordability concerns and increase access to homeownership across the province
